Hey guys I got this from START. Kristie Warr informed M. Ortiz that their tasking has ended and to forward any data requests to me. Do you want me to forward this to Greg Dempsey? or would you like to follow up with Mike Ortiz?

thanks

Eric Delgado

Hi Kristie,

The San Idelfonso Pueblo would like to have the following question answered if possible; What brand monitor was used for EPA rad air sampler? – "Can you describe the uses/differences of "result", "Net Concentration", and "Validated Result"? I know that all the pdf explanations are based on specific data but the information should focus on San Idelfonso Pueblo air sample data only, this should help in narrowing the attached pdf data explanation originally submitted by EPA to New Mexico. This is the second request as per our phone conversation today my first set of e-mails never reached you.

Please provide the information if possible to my e-mail, thank you for your help in this effort.

Best regards,

9470085

Michael Ortiz, Bureau Chief
Radiation Control Bureau
Environmental Protection Division
New Mexico Environment Department

Subject: Las Conchas Data Questions

Michael,

Per our conversation this morning, I understand you have a few questions regarding the data collected by EPA (START). One question is related to the monitoring equipment and the other is related to the various results provided for each sample.

Please respond to this email with your specific questions and copy Eric Delgado, EPA.

Thanks,
Kristie
